

 **ANESH ENVIRO SYSTEMS PVT LTD**

### **ID & FD FANS**

Fans are of sheet steel construction with backward curved self cleaning blades. The self – cleaning efficiency of an induced draft fan will increase when the tip angle of the blade is enlarged. Fans that are used to evacuate a space or create negative air pressure in a system are referred to as induced draft fans. Fan wheel has backward curved blades and is designed for either clockwise or anti-clockwise rotation. The blades and wheel are aerodynamically formed to ensure highest efficiency.
