BAG FILTERS

Bag Filter offers an effective and efficient solution for cleaning of air from dust, generated by plant process, storage silo, receiving bin, mixer, dryer, Belt conveyor, Screen etc. Air with Dust can produce an unpleasant, even hazardous work environment. Bag Filters are typically constructed from porous woven or felted fabric, tube-shaped, which gases are flowed through to remove particulates / contaminants. Contaminants larger than the porous openings within the bag filter allow the gas to pass through however trap the larger contaminant particles. Bag filter common applications: Vacuum cleaners, HVAC, water filtration, chemical, petrochemical, aquiculture, and food processing.
