

GANESH ENVIRO SYSTEMS PVT LTD

SURFACE AERATOR

Aqua Enviro Equipments design of aerator is based on pumping action wherein water is sucked in the centre and thrown in a volute trajectory in air leading to fragmentation of water in fine globulates and thus increasing oxygen absorption. These Aerators are designed for installation in tanks with fixed liquid levels. Our High efficiency Aerators give best result and has an oxygen transfer rate as high as 1.4 to 1.6 kg. / Hp / Hr. These aerators has the following features: Size Available: HP to 50 Hp. Our aerators give high efficiency as compared to the other methods of aeration. Due to the Slow Speed design there is less wear and tear of the moving parts and hence the life of these aerators is more.
